DETAILED ACTION

Claims

Claims 15 and 23 are amended.

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 15-23 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

Base claim 15 contains the recitation "obtaining a liquid crystal cell having a liquid crystal filled between two substrates stuck together by a sealant ..." which is a separate step from "forming a first opening and a second opening on at least one side face of the liquid crystal cell, wherein the first and second openings communicate with the space filled with the liquid crystal;". This results in a step of somehow making holes in the side of the seal of a filled liquid crystal cell, which is not found anywhere in the specification.

Application/Control Number: 10/735,170

Art Unit: 2883

As to claims 16-23, they are directly or indirectly dependent upon claim 15 rejected above.

Response to Arguments

Applicant's arguments filed on 28 February 2005 have been fully considered but they are not persuasive.

Applicant's ONLY substantive arguments are as follows:

The claims, as amended, comply with 35 U.S.C. 112, first paragraph.

Examiner's responses to Applicant's ONLY arguments are as follows:

It is respectfully pointed out that the amendments still read on the step of forming openings in a cell that is already filled with liquid crystal. That step is not supported in the specification and is inconsistent with the elected species.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Timothy L. Rude whose telephone number is (571) 272-2301. The examiner can normally be reached on Monday through Thursday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Frank Font can be reached on (571) 272-2415. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
